

A Foreign Animal Disease Contingency Toolkit

Preparing Producers. Protecting Pork.

Overview

In the case of an outbreak, below is an outline on how to get quick access to your data that will be necessary for business continuity. This data includes PremiseIDs, real-time inventory, movements, and digital biosecurity audits.

USEFUL STANDARD REPORTS

Pin Directory

Listing of all of your sites, PremiseIDs and attributes

Active Group Summary

An overview of your current active inventory and mortality numbers

Assurance Site History

Detailed overview of all audits performed at your sites including the FREE biosecurity audit

Movement Report

Single Row
Detailed manifest of all past internal and external movements

PROFESSIONAL SERVICES

MetaFarms Professional Services can help your organization with projects, and provide resources that may not be available internally. Some projects that we could help with:

- Custom report creation
- PremiseID collection, validation and input

Our professional services can be quoted on a project-to-project basis with an hourly rate of \$125.

DATA INTEGRATION

With producer approval, MetaFarms will supply whichever regulatory body with active inventories and site information for free. If you would like to electronically submit more than this, please contact us for a quote.

MetaFarms is a proud partner of the swine industry. Let us know how we can help you continue business.
