

## **.NET / SQL Programmer**

MetaFarms, Inc., a leading provider of Software as a Service (SaaS) information systems to livestock producers, is seeking to fill a full time .NET C# / SQL Server software development position. MetaFarms' cloud-based software applications enable livestock producers to more effectively manage and make superior decisions through the use of data.

We are currently seeking to fill a full time .NET C# / SQL Server software development position. The position will involve working with a number of exciting tools including SQL Server, .NET C#, and tablet / mobile applications.

### **Duties:**

- Team with implementation staff to deploy and manage new customers
- Team with customer service staff to respond to customer needs with applications
- Team with development staff to improve core product applications
- Develop new forms, reports, and stored procedures for applications
- Work to help tune, define, and implement SQL Server DBA standards with development, QA, and production databases

### **Qualifications:**

- Bachelor's degree in Computer Science, Computer & Information Science, Management Information Systems, or related field.
- 2+ years experience in a software production environment
- Required knowledge of .Net C# and SQL Server
- Knowledge of SQL design and Business Development Studio preferred
- Excellent communication skills and ability to work well in team atmosphere
- Strong analytical and problem solving capabilities
- Demonstrated quality approach to the software development process
- Ability to work in a demanding and challenging environment
- Displays strong abilities to learn new technologies and acquire new skills through independent study, professional training and senior team members
- Highly motivated, proactive personality
