MetaFarms Launches Report Manager

BURNSVILLE, Minn.—MetaFarms, Inc. today announced the launch of Report Manager, a new application within i-Production that enables users to customize, schedule, email and fax reports.

With Report Manager, users can now alter a number of available reports to fit their individual requirements. Columns can be hidden, width altered and printing options adjusted to meet their customization demands. Users can have one or many different formats of the same report.

The scheduling feature within Report Manager allows the user to automatically run reports at specified times. Reports can be scheduled to run daily, weekly, monthly, yearly or on a certain day. Any report selected by the user can be delivered via email, fax or available in a pick-up area to be viewed. The email provides a link to the designated report and provides notification that the report is available for viewing. User validation will restrict viewing of the reports to authorized personnel only.

Report Manager was developed by MetaFarms as a tool to interface with the i-Production Suite. MetaFarms' award winning i-Production Suite features five integrated applications for swine producers: Enterprise Manager, Sow Manager, Finishing Manager and Sales Manager and now Report Manager.

About MetaFarms

MetaFarms, Inc. provides a comprehensive suite of animal enterprise management applications to help businesses of all sizes and animal species meet the complex challenge of sharing and managing information on demand. MetaFarms' solutions enable producers to more effectively manage their businesses by reducing costs, enhancing yields, improving margins and monitoring animal health more efficiently.
