

Job Description

Job Title: Data Engineer	Date: August 2021
Reports To: VP of Technology	FSLA Status: Exempt – Base Salary

Summary/Purpose:

MetaFarms is a fast growing, progressive production software company focused on animal agriculture. MetaFarms has been in this business for over 20 years and now has significant market share in the North American pork industry. We are well positioned to continue gaining market share with opportunities to expand globally and to enter additional livestock markets. This individual will work with team members to implement and support our customers business and strategic needs.

Essential Job Functions:

- Key member of the product team building Business Intelligence and Analytics SaaS solutions
- Supporting and providing data in a ready-to-use form to analysts who are looking to run queries and algorithms against the information for predictive analytics and data mining purposes
- End-to-end architecture, planning, and implementation of data pipeline, ETL, reporting, and AI/ML driven analytics
- Gather requirements and specifications from clients and users during the project development lifecycle

Qualifications:

- Intermediate to Advanced working SQL knowledge and experience working with relational databases
- Experience in methodologies and processes for managing large scale databases on premise as well as cloud solutions
- Experience with ETL techniques and concepts
- Experience with SSAS Tabular Models
- Must be legally authorized to work in the United States for any employer without sponsorship.
- Above all else, a passion for quality and desire to grow are must haves for our company culture.
