

Genetics and nutrition are the largest investment you make in the production of your animals. FEED gives you the tools to optimize that investment. With intuitive feed ordering, comprehensive health monitoring, and extensive performance analytics, FEED puts you in front of the production costs that drive your bottom line.

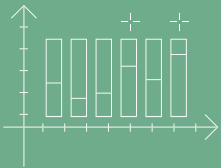

MetaFarms' FEED PRODUCT SHEET

COMPLETE DYNAMIC FEED MANAGEMENT

MONITOR... MANAGE... MAXIMIZE...

Gain visibility into the entire feed cycle. FEED allows you to easily monitor consumption rates, a vital indicator of health and growth. Reduce mortality with early intervention and manage ongoing health outbreaks and treatment orders including feed, water and injectable medications in use. Market healthy animals on time to maximize inventory placement.

From a family farm to large integrated operations, FEED was designed and developed to meet the demands of modern livestock production, raising the bar by leveraging technology to solve real-world inefficiencies.

Monitor health and reduce mortality.

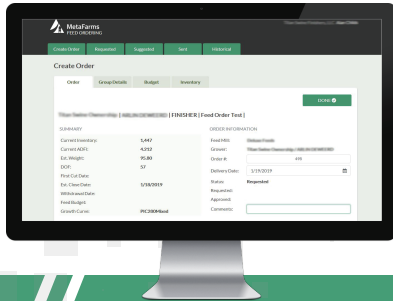

- Identify site outbreaks and enter treatment orders for water, feed or injectable medications.
- Flag sites on medication and withdrawal dates.
- See which groups are falling behind on consumption and may need veterinary intervention.

Manage risk and budgets with preemptive actions.

- Reconcile feed delivered by formulas, budgets and ingredient pricing.
- Record weekly price changes to reconcile invoices.
- Manage feed budget variances to identify costs involved with overage.
- Confirm formulas delivered are according to nutritionist specifications.

Maximize gain and lower sort loss.

- Compare gain based on growth curve expectations and feed delivered.
- Project reliable first cut dates with estimated market weights.
- Get pigs on the bus at the right time.
- Schedule new groups to assist with placement and pig flow.

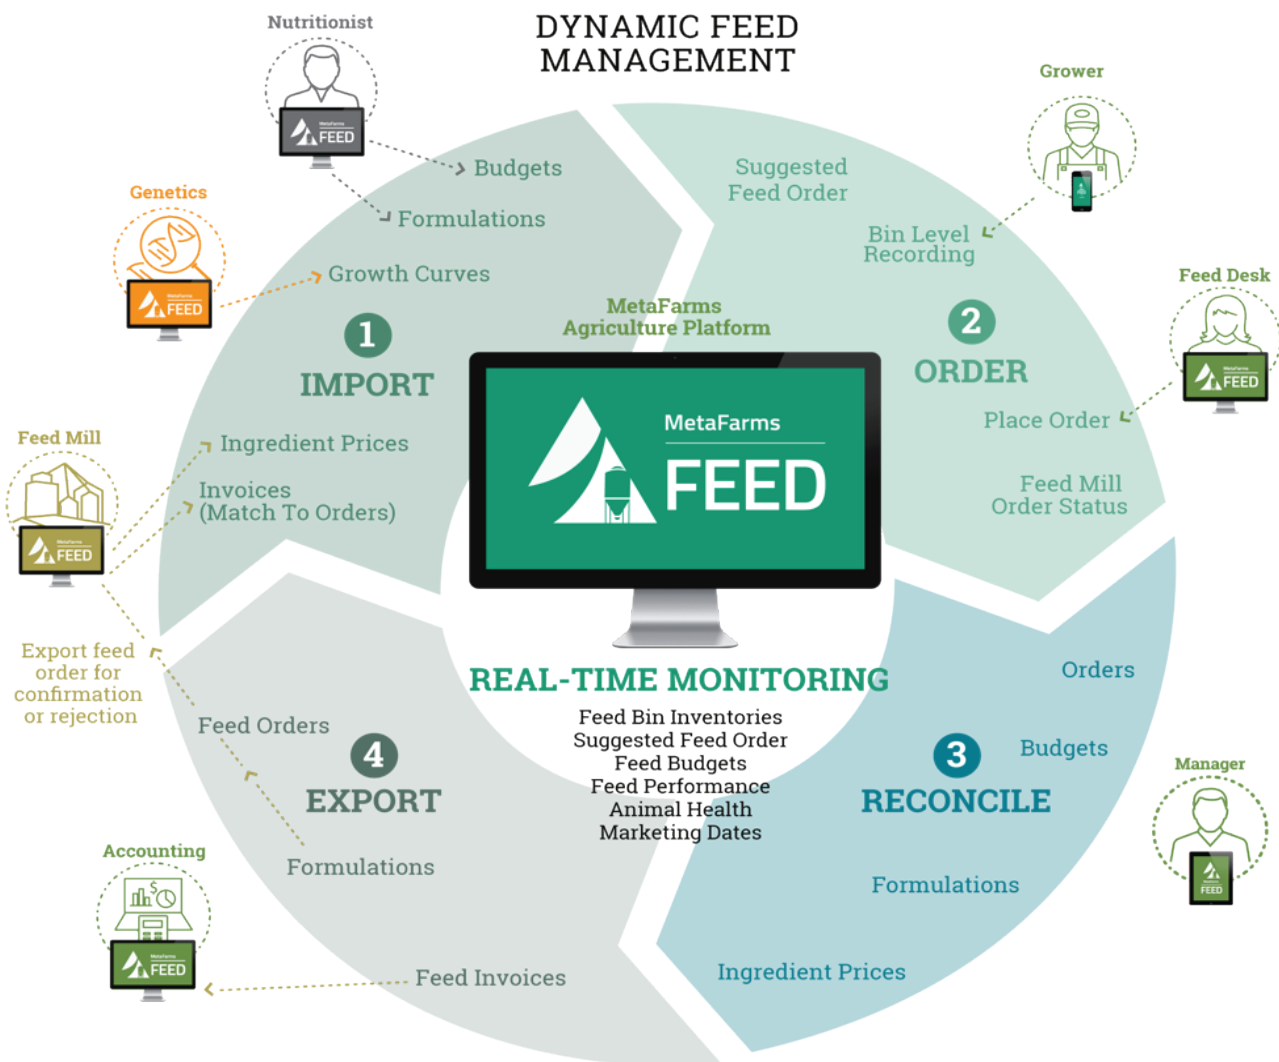

Sampling of Reports:

- Active Feed Orders
- Feed Monitoring Budget
- Feed Diet Usage
- Feed Monitoring Outage
- Feed Usage Report
- Feed Monitoring Sales
- Feed Performance
- Feed Reconciliation
- Feed Exception
- Feed Ingredient Usage
- Feed Ingredient Bid Pricing
- Diet Price Comparison by Mill
- Sow Farm Feed Intake Report
- Energy Conversion Report

FEED is inspired by customer demand for in-depth feed performance analytics and order management. It comes down to improved economics across the entire operation."
