

The Information Platform for Agriculture

## Job Description

Job Title: QA Automation Engineer	Date: March 23, 2022
Reports To: VP of Technology	FSLA Status: Exempt - Base Salary

### **Summary/Purpose:**

MetaFarms is a fast growing, progressive software development company focused on animal agriculture. MetaFarms has been in this business for over 20+ years and has significant market share in the North American pork industry. We are well positioned to continue gaining market share with opportunities to expand globally and to enter additional livestock markets. This individual will work with team members to implement and support our customers business and strategic needs.

### **Essential Job Functions:**

- Lead the QA function, including processes and tools to ensure product quality across web, mobile and API applications.
- Collaborate with your team during sprint cycles to design, develop, and execute automated tests for the business requirements and software designs
- Building, maintaining, and enhancing MetaFarms comprehensive automation framework used throughout our online SaaS platform
- Experience with one or more programming or scripting languages in either a development or QA capacity
- Write clear and concise bug tickets outlining the issue, expected results, and test parameters
- Make improvements to testing processes, technology, and interfaces that improve the effectiveness of testing

### **Required Skills and Experience:**

- 3+ years of manual testing & QA experience
- 1+ years of experience writing automated test suites
- Ability to perform functional integration testing of all integration points between the applications, components, and services
- Hands on experience with automated testing tools such as Cypress, Selenium, Espresso, and Postman
- Experience with formal QA methodologies
- Must be legally authorized to work in the United States for any employer without sponsorship.
- Above all else, a passion for quality and desire to grow are must haves for our company culture.
