

The Information Platform for Agriculture

Job Description

Job Title: Software Developer	Date: August 11, 2021
Reports To: VP of Technology	FSLA Status: Exempt - Base Salary

Summary/Purpose:

MetaFarms is a fast growing, progressive production software company focused on animal agriculture. MetaFarms has been in this business for over 20 years and now has significant market share in the North American pork industry. We are well positioned to continue gaining market share with opportunities to expand globally and to enter additional livestock markets. This individual will work with team members to implement and support our customers business and strategic needs.

Essential Job Functions:

- Development of web-based and mobile applications in all stages of project lifecycle
- Collaborate with development, analysts, and sales teams to design and deliver solutions
- Analyze technical requirements involved in the implementation of new features or modification of existing features
- Continually improve our processes and technology stack as the organization continues to grow
- Investigate and resolve issues in development, test and production environments

Required Skills and Experience:

- 2-4 years' experience in C#, .NET and MVC
- Relational database development experience (SQL)
- Experience with JavaScript, CSS, Angular
- Proficiency with JSON and building/maintaining REST API's
- Must be legally authorized to work in the United States for any employer without sponsorship.
- Above all else, a passion for quality and desire to grow are must haves for our company culture.
