

The Information Platform for Agriculture

Job Description

Job Title: Software Developer	Date: January 6, 2022
Reports To: VP of Technology	FSLA Status: Exempt - Base Salary

Summary/Purpose:

MetaFarms is a fast growing, progressive software development company focused on animal agriculture. MetaFarms has been in this business for over 20+ years and has significant market share in the North American pork industry. We are well positioned to continue gaining market share with opportunities to expand globally and to enter additional livestock markets. This individual will work with team members to implement and support our customers business and strategic needs.

Essential Job Functions:

- Development of web-based applications in all stages of project lifecycle
- Collaborate with Agile team to design and deliver solutions
- Analyze technical requirements involved in the implementation of new features or modification of existing features
- Continually influence and improve our processes and technology stack as the organization continues to grow
- Investigate and resolve issues in development, test and production environments

Required Skills and Experience:

- Full-stack development experience with 3-5years' experience in C#, .NET. Preference for .NET 5+ experience, willing to train
- 3+ years relational database development experience (SQL)
- Experience MVC/MVVM design patterns and dependency injection
- Proficiency with JSON and building/maintaining REST API's
- Exposure or familiarity with unit testing
- Must be legally authorized to work in the United States for any employer without sponsorship.
- Above all else, a passion for quality and desire to grow are must haves for our company culture.
