

The Information Platform for Agriculture

Job Description

Job Title: .Net Software Developer	Date: January --, 2025
Reports To: IT Manager	FSLA Status: Exempt - Base Salary
	Base Salary Range \$80,000 - \$100,000

Summary/Purpose:

MetaFarms is a fast growing, progressive software development company focused on animal agriculture. MetaFarms has been in this business for 25 years and has significant market share in the North American pork industry. We are well positioned to continue gaining market share with opportunities to expand globally and to enter additional livestock markets. This individual will work with team members to implement and support our customers business and strategic needs.

Essential Job Functions:

- Development of web-based applications in all stages of project lifecycle
- Collaborate with Agile team to design and deliver solutions
- Analyze technical requirements involved in the implementation of new features or modification of existing features
- Continually influence and improve our processes and technology stack as the organization continues to grow
- Investigate and resolve issues in development, test and production environments

Required Skills and Experience:

- 2-4 years of full-stack .NET web development experience.
- 3+ years of relational database development experience (MSSQL).
- Experience with Object-Relational Mappers (ORMs) such as Entity Framework or Dapper.
- Familiarity with unit testing frameworks and best practices.
- Proficiency in JSON and building/maintaining REST APIs.
- Experience working in an Agile development environment.
- Experience with MVC/MVVM design patterns.
- Must be legally authorized to work in the United States for any employer without sponsorship.
- A strong passion for quality and a desire to grow as part of a dynamic team.

Preferred Skills and Experience:

- Experience with .NET 6+ and Blazor
- Experience with integration testing frameworks and tools such as Test Containers.
- Familiarity with Azure products, including Web Jobs, Functions, App Services, and other cloud technologies.
- Exposure to containerization tools such as Docker.
- Knowledge of microservices architecture and distributed systems.
- Experience working in an Agile development environment.
- Familiarity with DevOps practices and CI/CD pipelines.
