

## Job Description

Job Title: Developer / UI Designer	Date: January 17, 2019
Reports To: Development Manager	FSLA Status: Base Salary + Bonus Incentive

### **Summary/Purpose:**

MetaFarms is seeking a developer to work as our User Interface Designer. Your role will be to build the user experience interface on the main components of our platform for web-based and mobile applications. You will be involved in design, coding, testing, and deployment of our applications.

This is your chance to join a high energy company delivering the most advanced software solutions in the industry.

### **Responsibilities:**

- Serve as the Front-End/UI Developer on a cross functional development team
- Contribute to the technical development of web-based and mobile applications in all stages of project lifecycle
- Collaborate with development, support, and sales teams to design and deliver solutions
- Continually improve and refactor legacy components to evolve into our modern target architecture
- Investigate and resolve issues in development, test and production environments
- Stay up-to-date on the industry and the ever-changing technology landscape

### **Qualifications:**

- Passion for designing applications that are visually appealing, and easy to use
- At least 2 years of experience writing HTML, CSS, Angular, and JavaScript in a production setting within an MVC framework
- Ability to learn new techniques, concepts, and technologies
- Good verbal and written communication skills.
- Familiarity with responsive design and UI/UX design principles

### **Additional Skills and Experience:**

- Microsoft platform experience is a plus (Visual Studio, Azure, SQL Server, Xamarin)
- Livestock / Agriculture knowledge
- Browser troubleshooting experience
